Administrator Evaluation and First-Year Teacher Self-Evaluation – Conceptual Framework

The numbers of responders was not what we would like. Initial contacts and two follow-ups are made to request the information. The evaluations are very similar (correlation = 0.64) with the overall administrator rankings slightly higher than the teacher self-evaluations (+0.07). The unit will continue to request feedback from the administrators and work to find ways to increase the response.

Administrator Evaluation and First-Year Teacher Self-Evaluation

2009

graduates

Level	N=	Admin Average	Teacher Average
