

Natural Sciences Department Program Assessment						
Learning Goal Assessed: Analysis: to recognize, understand, critically evaluate, and synthesize the components of a topic using logic and the scientific method						
Student Outcome Assessed: Students are able to use appropriate methods to verify the accuracy and robustness of their results.						
Semester:						
Course:						
Artifact Assessed:						
Rubric	Student outcomes [(1) used appropriate techniques correctly and (2) accurately described the results] will be assessed using the Likert scale below:					
1- neither done at all; 2- both minimally done (several or significant errors), or one absent and one satisfactorily (minor errors) done; 3- both parts present: one poor (several or significant errors) and one well done (only minor errors), or both moderately well done (several minor errors, no significant errors); 4- well done, both present, small errors or incompleteness; 5- both very well done (few errors or concerns)
